Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. **Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Blessinger.**
2. Blessinger teaches an interior elastic fabric sheet 18' and an exterior fabric sheet 18'' forming a wrap. The wrap encompasses an inflatable bladder 16. When the bladder 16 is inflated it would expand inwardly toward the body part and expand the elastic jacket 18 such as shown in figure 3. When the bladder expands the elasticity of the jacket material would expand evenly over the entire sheet even if different parts expanded at different rates. That is the natural property of elastic material. If the jacket were made of inelastic material then the jacket would expand to a point and the curvature of the device would cause buckling of the material. Therefore the elasticity of the interior sheet functions to exert a lateral force on the exterior sheet such that the inflatable bladder would be substantially wrinkle-free.
3. Blessinger teaches all of the structural limitations claimed. The recitation that the device is adapted for the application of fluid pressure on a human foot would be a capability of the Blessinger device. The Blessinger device is intended to be use on the upper arm of the patient. This size would clearly accommodate the human foot.

Allowable Subject Matter

4. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 8-20 are allowable over prior art to which the examiner is aware.

Response to Arguments

6. Applicant's arguments filed 5 April 2004, with respect to claims 1-20 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

7. Claim 1 remains to be broad and is comprehended by Blessinger. As noted above, Blessinger teaches a wrap comprised of an elastic jacket and a bladder contained therein and would appear to anticipate the claim.
